#### 1.0 INTRODUCTION

This report summarizes the findings of a Phase I Environmental Site Assessment (ESA) conducted by Chico Environmental Science and Planning on behalf of Paradise Recreation and Park District ("the District"). This ESA was performed at 5636 Feather River Place in Paradise, CA (**Figure 1**, **Figure 2**). The investigated subject property consists of approximately 3.53 acres in Assessor's Parcel Numbers (APNs) 054-250-054.

#### 1.1 PURPOSE

The purpose of this ESA is to review past and present land use practices, subject property operations and conditions, and nearby off-site land uses to evaluate the potential for soil and/or groundwater contamination of the subject property. The scope of services conducted for this ESA correspond to the American Society of Testing and Materials (ASTM) guidance presented in the ASTM Standard E 1527-21.

#### 1.2 SCOPE OF WORK

This ESA was conducted in general conformance with ASTM Standards Designation E1527-21, and includes the following tasks:

- Review of pertinent, available documents and maps describing local geologic and hydrogeologic conditions;
- Review of readily available historical aerial photographs of the subject property and surrounding area. These photographs were reviewed for evidence of previous subject property activities and development which would suggest the potential presence of hazardous substances at the subject property;
- Review and interpretation of archival U.S. Geologic Survey (USGS) topographic maps of the Paradise area, for information regarding historical land use potentially involving the manufacture, generation, use, storage, and/or disposal of hazardous substances at the subject property and adjacent properties;
- Interviews of the property owner/occupants and other informed parties to assess the current and past land uses at the subject property;
- A reconnaissance of accessible portions of the subject proeprty to assess evidence of current and/or past use or storage of toxic or hazardous materials; onsite ponds, landfills, drywells, waste streams or other disposal units; visible soil contamination, above-ground or underground storage tanks; electrical transformers containing polychlorinated biphenyls (PCBs); and drums, barrels and other storage containers;
- A visual review of adjacent properties to assess their potential to adversely impact the subject property;

- Review of the database list search conducted by Environmental Data Resources, Inc. of federal and state known or potentially hazardous waste sites or landfills, and sites currently under investigation for environmental violations;
- Inquiries to the Butte County Environmental Health Department for information regarding environmental permits, environmental violations or incidents, and/or the status of enforcement actions at the subject property or adjacent properties;
- Investigation of potential contamination from offsite migration of hazardous solids, liquids and vapors that could lead to a historical recognized environmental condition (HREC), controlled recognized environmental condition (CREC) or active recognized environmental condition (REC) in connection with the property; and
- Preparation of this report to present our findings and conclusions.

## **1.3 LIMITATIONS**

The conclusions presented in this report are professional opinions based upon visual observations of the subject property and vicinity, and our interpretation of the available historical information and documents reviewed, as described in this report. All records were obtained by or under the supervision of an environmental professional or via a third-party vendor specializing in retrieval of such information. All provided records and information were assumed to be true and complete unless otherwise known or determined inaccurate. The conclusions are intended exclusively for the purpose outlined in this report, and at the subject property location and project indicated. This report was completed and intended solely for the use of Paradise Recreation and Park District and their affiliates. The scope of services performed in execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this document or the findings, conclusions, or recommendations presented herein is at the sole risk of said user.

It should be recognized that this study was not intended to be a definitive investigation of potential environmental impacts at the subject property. Given that the scope of services for this investigation was limited, it is possible that currently unrecognized contamination may exist at the subject property.

Opinions and recommendations presented herein apply to the existing and reasonably foreseeable subject property conditions at the time of our assessment. They cannot necessarily apply to subject property changes of which this office is unaware and has not had the opportunity to evaluate. Changes in the conditions of this property may occur with time due to natural processes or works of man on the subject property or adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond our control.

#### 1.4 USER RELIANCE

April 13, 2022

To:

Re: 5636 Feather River Place

Paradise, CA 95969 APNs: 054-250-054

Dear Lender and SBA:

John Lane of Chico Environmental Science & Planning ("Environmental Professional") meets the definition of an Environmental Professional as defined by 40 C.F.R. § 312.10(b) and has performed the following Environmental Investigation:

A Phase I Environmental Site Assessment of the Subject Property dated <u>April 13, 2022</u> conducted in accordance with ASTM International's most recent standard (currently ASTM E1527-21). In addition, the Environmental Professional has addressed the performance of the "additional inquiries" set forth at 40 C.F.R. § 312.22;

Reliance by SBA and Lender. Environmental Professional (and Environmental Professional's firm, where applicable) understand(s) that the Property may serve as collateral for an SBA guaranteed loan, a condition for which is an Environmental Investigation of the Property by an Environmental Professional. Environmental Professional (and Environmental Professional's firm, where applicable) authorize(s) Lender and SBA to use and rely upon the Environmental Investigation. Further, Environmental Professional (and Environmental Professional's firm, where applicable) authorize(s) Lender and SBA to release a copy of the Environmental Investigation to the borrower for information purposes only.

Insurance Coverage. Environmental Professional (and Environmental Professional's firm, where applicable) certifies that he or she or the firm is covered by errors and omissions liability insurance with a minimum coverage of \$1,000,000 per claim (or occurrence), that the policy includes language that will provide coverage for Lender and SBA and that evidence of this insurance is attached. As to the Lender and SBA, Environmental Professional (and Environmental Professional's firm, where applicable) specifically waive(s) any dollar amount limitations on liability up to \$1,000,000 and further waives any right to indemnification by the Lender and SBA.

<u>Impartiality</u>. Environmental Professional certifies that (1) to the best of his or her knowledge, Environmental Professional is independent of and not a representative, nor an employee or affiliate of seller, borrower, operating company, or any person in which seller has an ownership interest; and (2) the Environmental Professional has not been unduly influenced

by any person with regard to the preparation of the Environmental Investigation or the contents thereof.

<u>Acknowledgment</u>. The undersigned acknowledge(s) and agree(s) that intentionally falsifying or concealing any material fact with regard to the subject matter of this letter or the Environmental Investigations may, in addition to other penalties, result in prosecution under applicable laws including 18 U.S.C. § 1001.

Environmental Professional

Printed Name: John Lane, Owner/Principal Scientist

Chico Environmental Science & Planning

#### 1.5 LIMITING CONDITIONS

This report does not include a limited (i.e., non-AHERA) asbestos survey, a limited radon survey, or a limited lead paint survey.

The title search is not included in our scope of services. However, we can arrange for a title and chain-of-title search for an additional fee.

The work conducted by Chico Environmental personnel with training and experience in hazardous substances investigations and was supervised by an Environmental Professional (as defined in ASTM 1527-21) and a California Professional Geologist. It is possible that this preliminary evaluation may reveal the need to perform more detailed (Phase II) field investigations (subsurface, surface, or air) to assess the potential presence of, or demonstrate the absence of, contaminated building media, soil, or groundwater beneath the subject property. Such investigations are outside the scope of this report.

The Phase I ESA is a limited and non-exhaustive survey that is intended to evaluate whether readily available information indicates that the historic or current use of the subject property resulted in contamination by hazardous substances or waste. As a result, without a comprehensive sampling and analysis program or implementation of services beyond the original scope of work, certain potential conditions, including, but not limited to those summarized below, may not be revealed:

- Naturally occurring toxic substances or elements found in the subsurface soils, rocks, or water
- Toxic substances commonly found in current habitable environments, such as stored household products, building materials, and consumables.
- Biological or infectious agents and pathogens.
- Contaminant plumes (liquid or gaseous) below the surface from a remote or unknown source.
- Inaccessible or concealed areas that may store or contain hazardous substances or wastes.
- Unknown, unreported, and not readily visible subject property contamination, which may have been caused by "midnight" dumping and/or accidental spillage.

#### 2.0 SUBJECT PROPERTY DESCRIPTION

The subject property is located in Paradise, CA east of Feather River Place and west of West Branch Feather River. The subject property is approximately 3.53 acres and is currently vacant. This ESA was performed as part of due diligence necessary for a California

Environmental Quality Act Initial Study for a real estate transaction. The subject property contained one approximately 300 square-foot house, which burned during the 2018 Camp Fire.

#### 2.1 SUBJECT PROPERTY LOCATION AND LEGAL DESCRIPTION

The subject property is located in Paradise, CA west of Feather River Place and approximately 750 feet east of the Feather River in Butte County, California. The subject property is situated on Assessor's Parcel Numbers (APN) 054-250-045. The subject property is located in Township 22N, Range 4E, Section 19 and latitude/longitude: 39.7512050051267, -121.57091030238873.

#### 2.2 CURRENT PROPERTY USE

The subject property is currently vacant and dense with old vegetation that was burnt in the 2018 Camp Fire. A road runs through the far eastern portion of the subject property adjacent to the Miocene Canal and the West Branch Feather River.

#### 2.3 CURRENT USE OF ADJACENT PROPERTIES

The subject property is surrounded by vacant lands to the north, east and south. Two single-family homes are located west and northwest of the subject property.

#### 2.4 PHYSICAL SETTING SOURCES

See Section 9.0 REFERENCES

#### 2.4.1 TOPOGRAPHY

The topography of the subject property is sloped to the east, with the highest elevation at 1855' and the lowest elevation at 1463' above mean sea level (msl). Topographic map coverage of the subject property area is provided by the current United States Geological Survey (USGS) Paradise East Quadrangle 7.5-minute series topographic map (2018 Paradise East).

#### 2.4.2 HYDROLOGY

The subject property is located in the Feather River hydrologic unit in the West Branch Feather River watershed. Shallow groundwater in the subject property vicinity is generally encountered between 35 and 66 feet below ground surface and flows east towards the Feather River.

#### 2.4.3 GEOLOGY/SOILS

The subject property is located in the eastern periphery of the Sacramento Valley and the southwestern foothills of the Cascade Range. The Sacramento Valley is the northern one-third of the Central Valley of California, which extends approximately 400 miles from the Tehachapi Mountains on the south to the Klamath Mountains in the north. The Sacramento Valley trough

is strongly asymmetric with the deepest part of the trough west of the apparent surface axis of the valley. The valley is bordered to the east by the Sierra Nevada to the north by the Klamath and Cascade Ranges and to the west by the Coast Ranges.

The Sacramento Valley was formed by downwarping of the west side of the Sierran block contemporaneous to uplift and erosion of the Sierra Nevada to the east, the Klamath and Cascade ranges to the north, and the Coast Ranges to the west. The valley is underlain by a basement complex composed of Paleozoic and Mesozoic granites and metamorphic rocks. The basement complex is overlain by a thick sequence of marine and non-marine sediments ranging in age from Cretaceous to Quaternary. The upper 1000 meters of the non-marine sediments are composed of sediments of volcanic origin, which were transported into the valley from the east as mudflows and stream carried sediments.

Paradise is situated on the eastern rim of the Great Valley, defined today by the floodplains of the Sacramento River and its tributaries. Around Paradise these sediments are dominated by thick fans of Feather River sediments, but just east of this there is a thin, north-south band of late Cretaceous sediments. These sit on top of the Sierran basement, which beneath Paradise comprise greenschist-facies metavolcanic rocks of Jurassic age, giving way to granites of the Sierra batholith to the east. These are manifestations of a vigorous island arc sequence, built out over an east-dipping subduction zone of mid- to late Mesozoic age. The gold veins lace this ancient arc, remobilized by Mesozoic shearing and intrusions of igneous rock. The crystalline foothills are locally overlain by a Cenozoic sequence of Eocene clean beach sands overlain by Neogene volcanics, including the Diamond Head-like profile of Table Mountain.

The stratigraphy of the vicinity generally consists of Tertiary pyroclastic and volcanic mudflow deposits (Cascade Range) (NRCS 2021). Site soils primarily consist of Paradiso loam at 2 to 15 percent slopes primarily made up of clay loams. The clayey residuum that makes up the Paradiso loam originates from weathered volcanic rock. The soil extends down approximately 84 inches and is well-drained with a medium run-off class (NRCS 2021). These soils are generally moderately well drained with highly available water storage and negligible runoff that results in minimal flooding or ponding. The site additionally contains Griffgulch-Surnuf-Spine taxadjunct with 30-50% slopes and Ultic Hapoxeralfs-Rockstripe-Rock outcrop, cliffs with 30-50% slopes, which are well drained with no flooding or ponding (**Figure 4**).

#### 2.4.4 FLOOD ZONE INFORMATION

The subject property is not located within a 500-year flood zone.

#### 3.0 HISTORICAL INFORMATION

#### 3.1 AERIAL PHOTOGRAPH REVIEW

Historical aerial photographs of the subject property vicinity for the years 1952, 1969, 1973, 1975, 1984, 1993, 1998, 2006, 2009, 2012, and 2016 were provided by Environmental Data Resources, Inc. These photographs were reviewed and interpreted for indications of past subject property and adjacent land uses that may have involved the manufacture, generation, use, storage, and/or disposal of hazardous materials. Referenced aerial photographs are included in **Appendix A** of this report.

- 1952 In the earliest available photograph, the subject property is a large parcel of land with dense vegetation and no visible structures. A road north-south running road is seen going through the eastern portion of the subject property. The West Branch Feather River is seen running north-south directly east of the subject property. The surrounding land is relatively dense with less vegetation around roads and parcels to the northwest. To the north and south there are a few structures visible. South of the subject property there is a plot that appears to be farmland. Pentz Rd. runs north-south directly west of the subject property. There are visible roads that branch out from the main Pentz Rd and onto other properties.
- 1969 There is little change to the subject property from the previous image other than the western portion of the property appearing more barren, which may indicate a driveway area. More large structures are visible to the north and to the south. There is a parking lot visible in the area north of the subject property. There is also additional farming on the plot to the south. The road structures to the northwest and west appear wider and more well defined.
- 1973 There is little change to the subject property. The western portion of the subject property appears dense with vegetation again.
- **1975** There is little change to the subject property. The area to the north appears more developed with additional structures.
- 1984 There is little change to the subject property. There appears to be additional structures throughout the area southwest of the subject property and north of the farmland to the south.
- 1993 There is little change to the subject property. More residential housing has appeared in the area south where farmland had previously been seen. Additional housing is also seen south west of the subject property and on the western side of Pentz Rd.
- **1998** There is little change from the previous image.
- 2006 The road running through the eastern portion of the subject property is no longer visible due to dense vegetation through the property and surrounding area. The main Pentz Rd. and surrounding roads are no longer visible due to dense vegetation. Additional development has appeared in the area north of the subject property.

- 2009 A small structures has appeared in the western portion of the subject property. Additional development is seen to the north, west, and south of the subject property with residential houses. The area with larger structures to the north had additional development as well.
- **2012** A canal is now visible running north-south through the eastern edge of the subject property adjacent to the existing road.
- **2016** There is little change from the previous image.

#### 3.2 FIRE INSURANCE MAPS

The complete holdings of the Sanborn Library, LLC collection were searched based on the subject property information and fire insurance maps covering the subject property were not found (**Appendix B**).

#### 3.3 CITY DIRECTORIES

The subject property was listed in the EDR City Directories search for the years 2005, 2010, 2014 and 2017 (**Appendix C**). In 2005 the subject property was listed as Nancy A Jenks. In 2010 the subject property was listed as Donna K Seaman. In 2014 the subject property was listed as Richard C Rasmussen. In 2017 the subject property was listed as Mark A Rubino. There are no records provided in the EDR database search prior to 2005 or after 2017.

## 3.4 HISTORICAL TOPOGRAPHIC MAPS

In order to corroborate and supplement information obtained through the review of maps and discussions with agency and other contacts, archival topographic maps were reviewed and interpreted for indication of topographic and land use change. Maps are cited by quadrangle name, scale, and year of publication. Historical topographic maps are included in **Appendix D**.

#### USGS Chico Sheet, 30-minute Series, 1:125,000 scale, 1891

The subject property is located in Paradise which is in the northeast portion of the Chico Sheet, east of the town of Chico. A few roads that connect to a small network of roads outline the town of Paradise. Very little development is depicted.

#### USGS Paradise Quadrangle Calif., 15 Minute Series, 1:62,500 scale, 1952

The subject property is located in the southern portion of the Paradise Quadrangle located in Section 19, Township 23N, Range 4E. The subject property is located on Pentz Road which is one of the three major roads that run through the town of Paradise. Buildings and roads have been established. Additionally, the Southern Pacific railroad goes through the town of Paradise.

USGS Paradise East Quadrangle, Calif., 7.5 Minute Series, 1:24,000 scale, 2022

The subject property is located in the southern. portion of the Paradise East Quadrangle located Section 19, Township 23N, Range 4E. The subject property is located on one of the major roads, Pentz Rd.

#### 4.0 REGULATORY RECORDS REVIEW

#### 4.1 REGULATORY AGENCIES

A review of readily available agency lists was conducted for information regarding hazardous substance releases, landfills, hazardous waste facilities, or environmental investigations at or near the subject property. Inquiries were made to the local Certified Unified Program Agency (CUPA), the Butte County Environmental Health Division. A search of state and federal agency databases was obtained from Environmental Data Resources, Inc. (EDR).

#### 4.1.1 STATE DPERATMENT

No records pertaining to this property were available.

#### 4.1.2 HEALTH DEPARTMENT

No records pertaining to hazardous materials for this property were available.

#### 4.1.3 FIRE DEPARTMENT

No records pertaining to hazardous materials for this property were available.

#### 4.1.4 AIR POLLUTION CONTROL AGENCY

No records pertaining to hazardous materials for this property were available.

#### 4.1.5 REGIONAL WATER QUALITY AGENCY

No records pertaining to hazardous materials for this property were available.

#### 4.1.6 DEPARTMENT OF TOXIC SUBSTANCES CONTROL

No records pertaining to hazardous materials for this property were available.

#### 4.1.7 BUILDING DEPARTMENT

No records pertaining to hazardous materials for this property were available.

#### 4.1.8 PLANNING DEPARTMENT

No records pertaining to hazardous materials for this property were available.

#### 4.1.9 OIL AND GAS EXPLORATION

No records pertaining to hazardous materials for this property were available.

#### 4.1.10 ASSESSOR'S OFFICE

No records pertaining to hazardous materials for this property were available.

#### 4.1.11 PUBLIC WORKS DEPARTMENT

No records pertaining to hazardous materials for this property were available.

## 4.2 MAPPED DATABASE RECORDS SEARCH

Chico Environmental reviewed information gathered from several environmental databases through Environmental Data Resources to evaluate whether activities on or near the subject property have the potential to impact environmental conditions at the subject property. EDR reviews databases compiled by federal, state, and local governmental agencies. The complete list of reviewed databases is provided in the EDR report, included in **Appendix E** and is summarized in **Table 1**. It should be noted that this information is reported as Chico Environmental received it from EDR, which in turn reports information as it is provided in various government databases. It is not possible for either Chico Environmental or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence.

Properties located hydraulically down gradient, cross gradient and/or at an excessive distance from the subject property are unlikely to adversely impact the subject property. Sites that are located within proximity and hydraulically up gradient of the subject property were further investigated to determine project status and potential threat of offsite contamination. Many of the databases searched by EDR are informational and do not necessarily indicate incidents of contamination.

EDR database listings are summarized on the following page. A complete listing of the EDR report, including descriptions of each database can be found in **Appendix E**.

**Unmapped Sites:** There were three unmapped sites in the report (See Section 4.2.5 Orphan Listings).

#### 4.2.1 REGULATORY DATABASE SUMMARY

The subject property is not listed in any of the databases included in the EDR database search.

There are four listings for adjacent properties included in the EDR database search, all of which were listed only in the RCRA/Non-Gen /NLR database.

#### 4.2.2 SUBJECT PROPERTY LISTINGS

The subject property is not listed in any of the databases included in the EDR database search.

## 4.2.3 ADJACENT PROPERTY LISTINGS

There are four listings for adjacent properties included in the EDR database search, all of which were listed only in the RCRA/Non-Gen /NLR database. This database includes selective information on sites, which generate, transport, store, treat, and/or dispose of hazardous waste as. defined by the Resource Conservation and Recovery Act (RCRA). Non- Generators do not presently generate hazardous waste. No violations were found for these sites.

#### 4.2.4 SITES OF CONCERN LISTINGS

There are no listings in the EDR database search that indicate a current threat to human and environmental health that would result in a recognized environmental condition at the subject property. No reports for the subject property were found in the Envirostor or Geotracker databases.

#### 4.2.5 ORPHAN LISTINGS

There EDR report identified 3 orphan listings. The first of these listings identifies a mine located on Big Bend Rd, which is approximately 4 miles southeast of the subject property. Due to the distance, it is unlikely this property has affected the subject property.

The second site identified is at the Feather River Bridge on Highway 162, which is located approximately 13.35 miles southeast from the subject property. Due to the distance, it is unlikely this property has affected the subject property.

The third site identified is at the Lower Feather River Gravel Supplementation and Improvement Project, which is located approximately 16.30 miles south of the subject property near Montgomery Street and Washington Avenue in Oroville. Due to the distance, it is unlikely this property has affected the subject property.

#### 5.0 USER PROVIDED INFORMATION AND INTERVIEWS

#### 5.1 INTERVIEWS

Interviews were conducted with the owner of the property Laura Miles and Butte County Environmental Health located at 202 Mira Loma Dr. Oroville, CA 95965.

#### 5.1.1 INTERVIEW WITH OWNER

In effort to develop a comprehensive understanding of the subject property history, a due diligence questionnaire was forwarded to the owner of the property, Laura Miles. Laura Miles reported that the property was used for residential purposes. She was not aware of any environmental cleanup liens and/or land use limitations against the property. The subject property was not reportedly used for industrial use at any time in the past. Additionally, the property was not reportedly used as a gas station, auto repair shop, laboratory, dry cleaners, fill/junkyard, printing shop, or as a waste treatment/storage/disposal/recycling facility. No chemicals, paints, petroleum products or pesticides were stored or used on the property. There were no drums or other bulk chemicals located on the property. Fill dirt has not been brought onto the property. There are no sumps, pits, ponds or lagoons related to waste treatment located on the property. There is no stained soil or pavement located on the property.

There was reportedly one septic tank for residential use on the subject property. It was reportedly unknown if there are/were any vent pipes, fill pipes or unidentified cover plates or pipes located on the property. There was no maintenance or shop/service area located on the property. There has not been any previous disclosure of hazardous materials in any buildings located on the property.

According to Laura Miles, there are no visible signs of spillage, staining, residues or corrosion in any buildings located on the property. There are no chemicals or other noxious odors on the property. There are no transformers or other heavy electrical equipment or hydraulics on the property that contain PCBs. There are no asbestos-containing materials located in buildings on the property. The property was not served by any wells or other non-public water supply. The owner has not been informed of past or current existence of hazardous substances or petroleum products or environmental violations on the property or any facility located on the property. The facility does not have any regulatory permits related to hazardous substances/wastes, wastewater discharge or air emissions. According to the questionnaire, the owner does not know of any radiation use on the property. The land is being donated. According to the questionnaire, Laura Miles has no knowledge or experience related to any obvious indicators that point to the presence or likely presence of contamination at the property. She does not have any other knowledge or experience with the property that may be pertinent to the environmental professional.

The complete Due Diligence Questionnaire are included in **Appendix F**.

5.1.2 INTERVIEW WITH REPORT USER See Section 5.1.1 INTERVIEW WITH OWNER.

5.1.3 INTERVIEW WITH KEY SITE MANAGER See Section 5.1.1 INTERVIEW WITH OWNER.

5.1.4 INTERVIEWS WITH PAST OWNERS, OPERATORS AND OCCUPANTS See Section 5.1.1 INTERVIEW WITH OWNER.

#### 5.1.5 INTERVIEW WITH OTHERS

Chico Environmental contacted the Butte County Environmental Health Department on April 7, 2022 to request hazardous waste disposal and storage records for the subject property. The Butte County Environmental Health Department responded to Chico Environmental's inquiries stating that there were no hazardous waste disposal and storage records associated with the subject property.

#### 5.2 USER PROVIDED INFORMATION

No additional information for this property was provided.

5.2.1 TITLE RECORDS, ENVIRONMENTAL LEINS, AND AULS

Not applicable

5.2.2 SPECIALIZED KNOWLEDGE Not applicable

5.2.3 ACTUAL KNOWLEDGE OF THE USER Not applicable

5.2.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES Not applicable

5.2.5 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION Not applicable

5.2.6 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION Not applicable

#### 6.0 SUBJECT PROPERTY RECONNAISSANCE

On April 12, 2022 Chico Environmental conducted a subject property site visit. The subject property was on Pentz Rd. and Feather River Place. Feather River Place was a narrow road with unstable hillsides to the east and west. At the entrance of the subject property, Chico Environmental observed a steep concrete driveway that led to a large unpaved area covered with disbursed pieces of vegetative debris. A pile of old fencing was observed in the northern corner of the unpaved area. Two descending levels of exposed hillside were observed within the unpaved area on the subject property as well. The rest of the subject property, approximately 3.3 acres, was not accessible, however, it was mainly burnt vegetation that could be seen from the entrance. From approximately 0.2 miles south down the road, a back road going through the western portion of the subject property could be seen along with the Miocene Canal and the West Branch Feather River. Chico Environmental attempted to access the back road leading to the western portion of the subject site but there was a locked gate preventing access.

No potential environmental hazards were observed during the subject property reconnaissance. Please refer to the photo sheet contained in **Appendix G**.

#### 6.1 GENERAL SUBJECT PROPERTY CHARACTERISTICS

The subject property is located in Paradise, CA west of Feather River Place and approximately 750 feet east of the Feather River in Butte County, California. The subject property is vacant with a concrete driveway that leads into an open unpaved area that is surrounded by dense vegetation.

#### 6.2 POTENTIAL ENVIRONMENTAL HAZARDS

No potential environmental hazards were observed.

#### 6.3 ADJACENT PROPERTY RECONAISSANCE

Northwest of the subject property are ruminants of what used to be a residential home prior to the 2018 Camp Fire. The property has a concrete driveway leading to a large open unpaved area that had concrete foundations from the previous home and was surrounded by vegetation. The property directly south of the subject property was an open unpaved area surrounded by vegetation.

#### 7.0 FINDINGS AND CONCLUSIONS

Chico Environmental performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-21; exceptions to or deletions from this practice are described in Section 7.0 of this report.

This assessment has revealed no evidence of a historical recognized environmental condition, controlled recognized environmental condition or active recognized environmental condition in connection with the property.

I am a Professional Geologist with the State of California. Chico Environmental has performed this assessment under my supervision in accordance with generally accepted environmental practices and procedures, as of the date of this report. I have employed the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental professionals practicing in this area. The conclusions contained within this assessment are based upon subject property conditions readily observed or were reasonably ascertainable and present at the time of the subject property inspection.

The conclusions and recommendations stated in this report are based upon personal observations made by employees of Chico Environmental and upon information provided by others. I have no reason to suspect or believe that information provided is inaccurate.

I declare that, to the best of my professional knowledge and belief I meet the definition of Environmental Professional as defined in #312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to access a property of the nature, history, and setting of the subject property (Appendix H).

I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Pare 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Chico Env. Science & Planning were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## **The EDR-City Directory Image Report**

#### **EXECUTIVE SUMMARY**

#### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

**Thank you for your business.** Please contact EDR at 1-800-352-0050 with any questions or comments.

### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 19 Next Scheduled EDR Contact: 07/11/2022
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

#### Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

**DEED: Deed Restriction Listing** 

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

#### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014

Next Scheduled EDR Contact: 05/16/2022 Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

Next Scheduled EDR Contact: 06/13/2022 Data Release Frequency: Annually

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

#### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface

waters, and toxic materials

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

#### **USGS TOPOGRAPHIC MAP**

Target Property Map: 12016141 PARADISE EAST, CA

Version Date: 2018

South Map: 12016089 CHEROKEE, CA

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

#### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

#### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

Not Reported

Additional Panels in search area: FEMA Source Type

06007C0575E FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

NOT AVAILABLE YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

#### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

#### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

Era: Mesozoic Category: Eugeosynclinal Deposits

System: Lower Jurassic and Upper Triassic

Series: Lower Mesozoic

Code: IMze (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: COHASSET

Soil Surface Texture: cobbly - loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 40 inches

Depth to Bedrock Max: > 72 inches

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	15 inches	cobbly - loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 5.10
2	15 inches	55 inches	cobbly - clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.00 Min: 4.50
3	55 inches	59 inches	weathered bedrock	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

#### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

stony - loam gravelly - loam

very stony - sandy loam very cobbly - sandy loam stony - sandy loam fragmental material cobbly - sandy loam gravelly - sandy loam

very cobbly - loam

Surficial Soil Types: loam

stony - loam gravelly - loam

very stony - sandy loam very cobbly - sandy loam stony - sandy loam fragmental material cobbly - sandy loam gravelly - sandy loam very cobbly - loam

Shallow Soil Types: very cobbly - sandy loam

Deeper Soil Types: cobbly - clay

unweathered bedrock fragmental material

## **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.
