**The Paradise Recreation and Park District proposes the Wildfire Risk Reduction Project, a network of interconnected trails, parks and managed open space to:**

- **Reduce wildfire risk to communities within the District's boundaries in Butte Creek Canyon, the Ridge and the Concow Basin.**
- **Provide open space recreational amenities for parks, hiking, biking, horseback riding and agricultural uses.**
- **Enhance the environment and watershed.**
- **Support local economic development.**

**The District will work with willing landowners on high priority properties in high risk areas.**
